CALENDAR YEAR TOTAL RETURNS AT NAV (%)

	2020	2021	2022	2023
NAV	4.61	27.77	-10.35	14.06

Reflects the percent change in net asset value (NAV) of Class A shares and includes the reinvestment of all distributions. Performance is shown for each calendar year. Performance of Class A shares with sales charge reflects the reinvestment of all distributions and includes initial maximum sales charge. Certain purchases of Class A shares without a sales charge are subject to a contingent deferred sales charge (CDSC). The CDSC is not reflected in the performance shown. Returns for less than one year are not annualized. Instances of high double-digit returns were achieved primarily during favorable market conditions and may not be sustainable over time.

Performance data quoted reflect past performance and are no guarantee of future results. Current performance may be higher or lower than the performance quoted. The investment return and principal value of an investment in the Fund will fluctuate so that shares, on any given day or when redeemed, may be worth more or less than their original cost. You can obtain performance data current to the most recent month-end by calling Lord Abbett at 888-522-2388 or referring to lordabbett.com.

¹Reflects expenses for the Fund's fiscal year end and is subject to change. Fund expenses may fluctuate with market volatility. A substantial reduction in Fund assets (since its most recently completed fiscal year), whether caused by market conditions or significant redemptions or both, will likely cause total operating expenses (as a percentage of Fund assets) to become higher than those shown.

²Reflects the average net expenses of Class A shares of all funds within the Lipper Multi-Cap Value Funds Category based on Lipper data available.

A Note About Risk: The value of investments in equity securities will fluctuate in response to general economic conditions and to changes in the prospects of particular companies, including market, liquidity, currency, and political risks. As compared to smaller successful companies, larger, more established companies may be less able to respond quickly to certain market developments and may have slower rates of growth. Investments in value companies can continue to be undervalued for long periods of time and be more volatile than the stock market in general. The Fund may invest in foreign or emerging market securities, which may be adversely affected by economic, political, or regulatory factors and subject to currency volatility and greater liquidity risk. To the extent that the Fund invests its assets in the securities of a small number of issuers, the Fund will be subject to greater volatility with respect to its investments than a fund that invests in the securities of a larger number of issuers. These factors can adversely affect Fund performance. The fund performance history at this time is very limited; therefore, performance achieved during its initial period of investment operation may not be replicated over longer periods and may not be indicative of how the Fund will perform in the future.

The Fund's portfolio is actively managed and is subject to change.

[†]The net expense ratio is based on estimates for the current fiscal year and takes into account contractual fee waivers/expense reimbursements that currently are scheduled to remain in place through 02/28/2025. For periods when fees and expenses were waived and/or reimbursed, the Fund benefited by not bearing such expenses. Without such fee waivers/reimbursements, performance would have been lower.

GLOSSARY OF TERMS

Weighted Average Market Capitalization is the average market capitalization of all companies held in the portfolio, with each company weighted according to its percent held in the portfolio.

Price/Earnings Ratio is the weighted average of each holding's P/E ratio (price of a stock divided by its earnings per share).

The Russell 1000® Value Index measures the performance of those Russell 1000 companies with lower price-to-book ratios and lower forecasted growth values. Index is unmanaged, does not reflect the deduction of fees or expenses, and is not available for direct investment.

Lipper Multi-Cap Value Funds Average is based on a universe of funds with similar investment objectives as the Fund. Source: Lipper Analytical Services.
