

INVESTMENT GRADE FLOATING RATE FUND

LOWER EXPENSES - CLASS A

Fund Expense Ratio ¹	0.55%
Category Average ²	1.12%

INVESTMENT OBJECTIVE

The Fund's investment objective is to seek a high level of current income.

PORTFOLIO CHARACTERISTICS

Average Effective Duration: 0.3 Years
Average Maturity: 10.9 Years
Number of Issues: 207

FUND SYMBOLS/CUSIPS

Class A:	LGRAX	54401T421
Class C:	IGRCX	54401T413
Class F:	LGRFX	54401T397
Class F3:	IGRNX	54401T389
Class I:	LGRYX	54401T371
Class R5:	IGRSX	54401T330
Class R6:	LGRUX	54401T322

Not all share classes are available to all investors. Please see prospectus for more information.

AVERAGE ANNUAL TOTAL RETURNS (%) AS OF 09/30/2024

CLASS A SHARES	YTD	1 YEAR	SINCE INCEPTION	EXPENSE RATIOS ¹	
				Gross	Net [†]
Net Asset Value (without sales charge)	6.45	8.71	9.03		
Maximum Offering Price (with 2.25% sales charge)	4.08	6.29	7.28	1.95%	0.55%

Reflects the percent change in net asset value (NAV) of Class A shares and includes the reinvestment of all distributions. Performance of Class A shares with sales charge reflects the reinvestment of all distributions and includes initial maximum sales charge. Certain purchases of Class A shares without a sales charge are subject to a contingent deferred sales charge (CDSC). The CDSC is not reflected in the performance shown. Returns for less than one year are not annualized. Instances of high double-digit returns were achieved primarily during favorable market conditions and may not be sustainable over time.

Performance data quoted reflect past performance and are no guarantee of future results. Current performance may be higher or lower than the performance quoted. The investment return and principal value of an investment in the Fund will fluctuate so that shares, on any given day or when redeemed, may be worth more or less than their original cost. You can obtain performance data current to the most recent month-end by calling Lord Abbett at 888-522-2388 or referring to lordabbett.com.

¹Reflects expenses for the Fund's fiscal year end and is subject to change. Fund expenses may fluctuate with market volatility. A substantial reduction in Fund assets (since its most recently completed fiscal year), whether caused by market conditions or significant redemptions or both, will likely cause total operating expenses (as a percentage of Fund assets) to become higher than those shown.

²Reflects the average net expenses of Class A shares of all funds within the Lipper Loan Participation Funds Category based on Lipper data available.

New Fund Risk: The Fund is newly organized. There can be no assurance that the Fund will reach or maintain a sufficient asset size to effectively implement its investing strategy.

A Note about Risk: The Fund is subject to the general risks associated with investing in debt securities, including market, credit, liquidity, and interest rate risk. The value of investments in debt securities will fluctuate in response to market movements. When interest rates rise, the prices of debt securities are likely to decline, and when interest rates fall, the prices of debt securities tend to rise. The Fund invests in various types of high quality, investment grade debt securities but may also invest in high yield, lower-rated debt securities, sometimes called junk bonds that may involve greater risks than higher rated debt securities. These securities carry increased risks of price volatility, illiquidity, and the possibility of default in the timely payment of interest and principal. The Fund may invest in foreign or emerging market securities, which may be adversely affected by economic, political, or regulatory factors and subject to currency volatility and greater liquidity risk. The Fund may invest in derivatives, which are subject to greater liquidity, leverage, and counterparty risk. The fund performance history at this time is very limited; therefore, performance achieved during its initial period of investment operation may not be replicated over longer periods and may not be indicative of how the Fund will perform in the future. These factors can affect Fund performance. The Fund's portfolio is actively managed and is subject to change.

FUND BASICS

Total Net Assets (\$M):³ \$117.5
Inception Date: 05/01/2023 (Class A)
Capital Gains Distribution: December
Dividend Frequency: Monthly
Minimum Initial Investment: \$1,500

EXPENSE RATIOS ¹	GROSS	NET [†]
Class A:	1.95%	0.55%
Class C:	2.75%	1.35%
Class F:	1.85%	0.35%
Class F3:	1.68%	0.28%
Class I:	1.75%	0.35%
Class R5:	1.75%	0.35%
Class R6:	1.68%	0.28%

[†]The net expense is based on estimates for the current fiscal year and takes into account contractual fee waivers/expense reimbursements that currently are scheduled to remain in place through 11/30/2024. For periods when fees and expenses were waived and/or reimbursed, the Fund benefited by not bearing such expenses. Without such fee waivers/reimbursements, performance would have been lower.

PORTFOLIO BREAKDOWN

Allocations are reported as of the date a security transaction is initiated; however, certain transactions may not settle until several days later. Accordingly, cash may appear as a negative allocation as a result of unsettled transactions. If applicable, "Other" may include municipal bonds and non-index holdings.

CREDIT QUALITY DISTRIBUTION

Ratings (other than U.S. Treasury securities or securities issued or backed by U.S. agencies) provided by Standard & Poor's, Moody's, and Fitch. For certain securities that are not rated by any of these three agencies, credit ratings from other agencies may be used. Where the rating agencies rate a security differently, Lord Abbett uses the median, but if there are only two ratings, the lower rating is used. Ratings range from AAA (highest) to D (lowest). Bonds rated BBB or above are considered investment grade. Credit ratings BB and below are lower-rated securities (junk bonds). High-yielding, non-investment-grade bonds (junk bonds) involve higher risks than investment-grade bonds. Adverse conditions may affect the issuer's ability to pay interest and principal on these securities. A portion of the portfolio's securities may not be rated. Breakdown is not an S&P credit rating or an opinion of S&P as to the creditworthiness of the issuers of the underlying securities and not the fund or its shares. Ratings may be subject to change.

GLOSSARY OF TERMS

Lipper Loan Participation Funds Average is based on a universe of funds with similar investment objectives as the Fund. Source: Lipper Analytical Services.

Effective Duration is the change in the value of a fixed income security that will result from a 1% change in market interest rates, taking into account anticipated cash flow fluctuations from mortgage prepayments, puts, adjustable coupons, and potential call dates. Duration is expressed as a number of years, and generally, the larger a duration, the greater the interest-rate risk or reward for a portfolio's underlying bond prices. Where applicable, securities, such as common or preferred stock, convertible bonds and convertible preferred stock, ETFs and ADRs, and CPI swaps and related futures, are excluded from these calculations.

Average Maturity is the length of time until the average security in a portfolio will mature or be redeemed by its issuer in proportion to its dollar value. Indicating a portfolio's sensitivity to general market interest rate changes, a longer average maturity implies greater relative portfolio volatility.

Asset-Backed Security (ABS) is a financial security backed by a loan, lease or receivables against assets other than real estate and mortgage-backed securities. For investors, asset-backed securities are an alternative to investing in corporate debt.

Mortgage-Backed Security (MBS) is a variation of asset-backed securities that are formed by pooling together mortgages exclusively.

Collateral Loan Obligation (CLO) is a special purpose vehicle (SPV) with securitization payments in the form of different tranches. Financial institutions back this security with receivables from loans. Collateralized loan obligations are the same as collateralized mortgage obligations (CMOs) except for the assets securing the obligation. CLOs allow banks to reduce regulatory capital requirements by selling large portions of their commercial loan portfolios to international markets, reducing the risks associated with lending.
