GROWTH OF \$10,000

Based on a hypothetical Class A Share investment of \$10,000 on 03/18/1998, at net asset value and includes the reinvestment of all distributions. Data as of 12/31/2023.

CALENDAR YEAR TOTAL RETURNS AT NAV (%)

	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023
NAV	2.90	-1.06	9.20	20.59	-9.44	24.82	26.08	14.94	-23.44	13.91

Reflects the percent change in net asset value (NAV) of Class A shares and includes the reinvestment of all distributions. Performance is shown for each calendar year. Performance of Class A shares with sales charge reflects the reinvestment of all distributions and includes initial maximum sales charge. Certain purchases of Class A shares without a sales charge are subject to a contingent deferred sales charge (CDSC). The CDSC is not reflected in the performance shown. Returns for less than one year are not annualized. Instances of high double-digit returns were achieved primarily during favorable market conditions and may not be sustainable over time.

Performance data quoted reflect past performance and are no guarantee of future results. Current performance may be higher or lower than the performance quoted. The investment return and principal value of an investment in the Fund will fluctuate so that shares, on any given day or when redeemed, may be worth more or less than their original cost. You can obtain performance data current to the most recent month-end by calling Lord Abbett at 888-522-2388 or referring to lordabbett.com.

¹Reflects expenses for the Fund's fiscal year end and is subject to change. Fund expenses may fluctuate with market volatility. A substantial reduction in Fund assets (since its most recently completed fiscal year), whether caused by market conditions or significant redemptions or both, will likely cause total operating expenses (as a percentage of Fund assets) to become higher than those shown. Gross Expense Ratio includes Management fees, Distribution and Service (12b-1) fees, Acquired Fund Fees and Expenses, and Other Expenses.

²The Fund invests all its net assets directly in the underlying funds. The holdings shown are based on individual securities owned in one or more of the underlying funds.

A Note about Risk: The Fund invests primarily in U.S. and global small, mid-sized and micro-cap stocks, which tend to be more volatile and less liquid than large cap company stocks. The value of the underlying funds' investments and the net asset values of the shares of both the Fund and the underlying funds will fluctuate in response to various market and economic factors related to equity markets, as well as the financial condition and prospects of issuers in which the underlying funds invest. Investments in small, mid-sized and micro-cap company stocks typically involve greater risk, particularly in the short term, than those in larger, more established companies. Investments in either growth or value stocks may shift in and out of favor for long periods of time, depending on market and economic conditions. Investing internationally involves risks not associated with investing solely in the United States, such as currency fluctuation, political risk, differences in accounting and the limited availability of information. These risks can be greater in the case of emerging country securities. The Fund is subject to the risks associated with derivatives, which may be different from and greater than the risks associated with investing directly in securities and other investments. These factors can affect Fund performance.

The Fund's portfolio is actively managed and is subject to change.
